"Omnia mutantur, nihil interit" (Tutto cambia, nulla muore) - **Ovidio, Metamorfosi, XV,165**

Il cambiamento è la condizione "naturale" delle società umane. Si tratta di modificazioni più o meno consistenti e rapide, di costumi, idee, credenze e valori. Talvolta, esse possono riguardare all'inizio un solo settore, ma esiste poi un effetto trascinarsi verso altre aree per cui la tecnologia influenza l'economia con tutti relativi connessi.

Non sempre questi mutamenti, in genere, sono sincroni. Per esempio, la tecnologia e l'economia possono cambiare più velocemente dell'organizzazione sociale e religiosa.

Ma, oggi, in un mondo globalizzato e interconnesso, in ogni settore, tutto è molto più rapido e dalle conseguenze imprevedibili.

Steve Jobs, fondatore di Apple, diceva "io cambierò la vostra vita". Profezia avverata. Una sottile maledizione cinese dice "Ti auguro di vivere in tempi interessanti".

Nella attuale web society anche il rapporto salute-malattia è cambiato con l'avvento di nuovi strumenti legati allo scambio, trasmissione e condivisioni delle informazioni sanitarie riproponendo un nuovo rapporto medico-paziente.

Anche il mondo delle Terme, con le sue antiche tradizioni e connessioni nella storia e nella attualità della civiltà umana, non può esonerarsi da queste esigenze socio-economico ambientali e proporre a se stesso un'analisi critica propositiva di aggiornamento alle nuove realtà. E allora, compaiono alcuni interrogativi.

Quale ruolo hanno, oggi, le Terme nella web society? Quali risposte il Termalismo può dare alle nuove esigenze di salute nel mondo della e-health? Che tipo di innovazioni si richiedono per affrontare le sfide dei nuovi strumenti legati alla evoluzione tecnologica e delle metodologie terapeutiche? Salute, malattia, rapporto medico-paziente e con il territorio trovano nella cultura e organizzazione termale un adeguato supporto? Le patologie legate alla pandemia COVID-19 hanno visto un ruolo appropriato della medicina termale nei trattamenti riabilitativi? Le esigenze di evidenza, razionalità, tradizione, efficacia ed efficienza, oggi richieste nella "good practice", sono realmente offerte?

A queste domande, con le relative possibili proposte di soluzione, si cercherà di rispondere con l'ampio dibattito e confronto internazionale del 73° Convegno della Femtec dedicato a **"IL TERMALISMO NELLE SOCIETÀ IN CAMBIAMENTO. Approccio multilaterale per la cura della salute e del benessere"**.

Femtec ritiene, infatti, anche sulla base della sua lunga esperienza, che il sistema termale, italiano e internazionale, abbia in sé tutti gli elementi capaci di proporre e realizzare un rinnovamento-rinascimento di questa antica tradizione di prevenzione, cura e riabilitazione.

Ma, come evidenziato nelle tematiche affrontate nei precedenti Congressi di Femtec (<https://www.femteconline.org/info.php?s=CONGRESSES>), sono indispensabili approcci multidisciplinari (tecnico-scientifico -culturale) e multilaterali (politico, economico, sociale organizzativo).

Temi principali del Congresso:

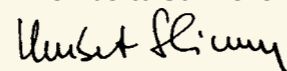

- **Ricerca come fattore di conoscenza e corretta informazione**
- **La Formazione (universitaria e post universitaria, face to face e on line)**
- **Il ruolo dei pazienti e operatori termali**
- **Tecnologie e strutture dei Centri Termali**
- **Organizzazione e gestione del territorio dei Comprensori Termali**
- **Partnerships pubblico privato**
- **Marketing tradizionale e informatico**
- **Turismo sostenibile e della salute. Il concetto di ONE HEALTH**
- **Assicurazione sanitaria**
- **Politica sanitaria regionale e nazionale**
- **Normative giuridico amministrative.**

Sono previsti specifici workshops su: Scienze Motorie e Medicina termale come alleanza strategica per la salute e gli stili di vita; Il Progetto "Wellness and Spa Tourism Sectoral Skills' Development – WESKILL" (Co-founded by the Erasmus+ programme of the European Union) per gli operatori del turismo della salute; Thermae & Diplomacy.

Quest'anno il 73° Congresso di Femtec si svolge alle Terme di Castel San Pietro Terme (Bologna, Italia), luogo di cura citato per le proprietà delle sue acque sin dal XIV secolo. Queste sono classificate come solfuree e salsobromiodidiche e consentono trattamenti di prevenzione, cura e riabilitazione per patologie dell'apparato respiratorio e osteoarticolare. La sua moderna e aggiornata struttura sanitaria, di ospitalità e di management, inserita in un contesto territoriale di pregevole offerta turistica, può rappresentare la realizzazione di un "modello" concreto di un **termalismo del nostro tempo**.

Benvenuti a Castel San Pietro Terme!

Il Presidente
Pr. Umberto Solimene

Segreteria:

• Simona Busato
simona.busato@libero.it (ita – eng)

• Natalia Chaurskaya
natmo@mail.ru (fre – rus)

Presidente:

umberto.solimene@unimi.it

TUTTE LE INFORMAZIONI IN MERITO AL CONGRESSO SONO REPERIBILI SUL SITO DEDICATO

www.femteconline.org/_CastelSanPietro/

Sede Congresso:

Anusca Palace Hotel****
Viale Terme n. 1058, Castel San Pietro Terme, 40024
Bologna, Italia

Hotel (soggiorno e pernottamento):

Anusca Palace Hotel**** www.anuscapalacehotel.com
Referente: Vincenzo D'angelo marketing@anuscapalacehotel.it

• Proposta di quattro giorni (3 notti) come dal seguente programma preliminare:

- **CAMERA CLASSIC 458,00 EURO**

SERVIZI INCLUSI:

Pensione completa, accesso SPA Hotel, partecipazione Congresso, coffee break, cena di Gala, atti congresso, attestati, awards, escursioni culturali, visita all'Outlet Castel Guelfo.

SERVIZI ESCLUSI:

Supplemento camera Executive € 60.00, tassa di soggiorno € 2.00 per persona al giorno, transfer da e per aeroporto di Bologna € 75.00 a tratta, eventuali transfer di gruppo richiesti anticipatamente all'hotel ospitante.

Accompagnatori: 290,00 EURO*

*Pensione completa, accesso SPA Hotel, cena di Gala, tour culturale, pranzo tipico e shopping in Bologna.

•Per la sola partecipazione alle sessioni scientifiche del Congresso: accesso gratuito tramite registrazione.

WORLD FEDERATION OF HYDROTHERAPY AND CLIMATOTHERAPY

F E M T E C

Sito web: www.femteconline.org

La FEMTEC (Federazione Mondiale del Termalismo e della Climatoterapia), **fondata nel 1937**, riunisce le Istituzioni nel settore pubblico e privato che rappresentano i Centri Termali nei rispettivi Paesi. Attualmente le Nazioni aderenti sono 32.

La FEMTEC è **l'unica** Organizzazione non Governativa (NGO) del settore in relazione ufficiale con **l'Organizzazione Mondiale della Sanità (OMS)**.

Tra i principali scopi della Federazione segnaliamo:

- rappresentare il termalismo mondiale, nelle diverse sedi istituzionali nazionali e internazionali, e promuoverlo;
- favorire la cooperazione internazionale;
- promuovere l'interscambio di studi, ricerche, formazione ed esperienze nel settore.

La FEMTEC ha diverse Commissioni (Medica, Turismo e Salute, Tecnica, Economia e Innovazione Tecnologica, Spa Management, Ufficio Affari Internazionali) e 3 sottocommissioni (Medicina Termale Integrata, Medicina Complementare, Ricerca Scientifica) operative nel settore medico, economico, tecnico e sociale.

La Federazione ha anche rapporti istituzionali con **l'Associazione Europea delle Spa (ESPA)**, **l'Organizzazione Mondiale del Turismo (WTO)**, la **Società Internazionale di Idrologia Medica e Climatologia (ISMH)**, **l'Istituto del Benessere Mondiale (GWI)** e altre organizzazioni internazionali.

Il Presidente è il Prof. Umberto Solimene (Italia), dell'Università degli Studi di Milano, una delle figure più rappresentative del Termalismo Mondiale.

FEMTEC ha 4 Centri permanenti di formazione:

- **Italia** (www.thermaecampus.it);
- **Russia** (coll. con Russian International Academy for Tourism (www.rmat.ru));
- **Cina** (in collaborazione con Chinese Hot Spring Association);
- **Tunisia** (coll. con Ministero della Salute, www.thermalisme.nat.tn).
